

**Gebze Institute of Technology**  
**Department of Computer Engineering**  
**BIL 565**  
**Computer Vision**  
**Spring 2024**  
**Paper Presentation for Graduate Students**  
**No Late Submissions**  
**This task is compulsory for Graduate Students**

Choose a CVPR (<http://openaccess.thecvf.com/menu.py>), ICCV (<http://openaccess.thecvf.com/menu.py>), or ECCV paper from 2015 to 2024. Read and understand the paper fully. You will also write a 4 page report. You will make a 15 minute presentation of the paper that you selected at the end of the semester.

The following are the steps for your paper reports and presentations.

- June 10<sup>th</sup> 2024, Final version of your paper: 4 page report for your paper. The main method, the experimental results, and most importantly, what can be done to improve the method discussed in the paper.
- Finals week: you will do the presentation of the paper and your experiments. You will also show your experiment results.
